Common spreadsheet challenges we solve:

- ✓ Slow, lagging workbooks
- ✓ Costly human error
- ✓ Unreliable workflows
- ✓ Manual data entry
- ✓ Repetitive, low value tasks
- ✓ Reporting inefficiencies & analysis paralysis

40 Clients in the past 12 months

137 Transactions in the past 12 months

4 Average projects per client

Smart ways we transform your spreadsheets into business assets:

Boosting Efficiency: Making files faster, simpler, and more error-proof

Protecting Formulas: Preventing accidental overwrites

Applying Sleek Formatting: Enhancing reports with professional branding and logos

Implementing Advanced Formulas: Handling complex calculations with ease

Developing Macros and VBA: Automating repetitive tasks like filtering and pasting with one click

Automating Data Preparation: Integrating and cleaning datasets so your data is always ready for use

Creating Custom Dashboards: Maximizing your time for key decision-making

Data Extraction from PDFs and Images: Integrating AI-powered OCR technology into spreadsheet-based workflows

Benefits of working with Excel Rain Man

A highly technical team with decades of combined experience in software development, database administration, business, project management, and data science

Affordable: Most platforms we use have no licensing fees

Minimal Learning Curve: Solutions are built in familiar tools

Report-Centered Design: We create solutions with custom reports but also tee users up for ad-hoc reporting

Integrated Solutions: Automated workflows and reporting that connect external data sources via APIs and AI-driven tools

Work smarter, not harder
